MOTO Q™ PRO

Style Meets Productivity

Introducing the MOTO Q PRO—the combination of the cutting-edge Motorola Q smartphone with the MOTO Q PRO package that expands functionality and enriches security for the most demanding mobile professional.

MOTO Q PRO is the ultrathin smartphone with powerful e-mail/PIM capability, exceptional voice quality and application flexibility. The MOTO Q PRO solution enhances mobility and security with an extended battery, vehicle power adapter, headset, document editing, security tools and optional camera disablement.

Your MOTO Q PRO enables you to stay productive no matter where you go using Documents To Go, which allows you to view and edit Microsoft® Word files and to view Microsoft® Excel and PowerPoint as well as Adobe PDFs. MOTO Q PRO support for Windows Mobile™ 5.0 helps to improve mobile workforce productivity and customer responsiveness using CRM, sales force management and field service automation business applications.

MOTO Q PRO supports a large and growing application library and makes it easy to develop new business applications by leveraging the familiar development environments of Microsoft® .NET Compact Framework and Microsoft® Visual Studio.

The MOTO Q PRO solution features Motorola's Mobile Security Platform Professional, which provides user-controlled security features such as on-device firewall, intrusion detection, password protection and data encryption that safeguard data stored on the device. For the enterprise seeking central control of security, Mobile Security Platform Professional can be upgraded for seat licenses of Mobile Security Platform Enterprise, which requires a server that's sold separately.

For camera-restricted environments, the MOTO Q PRO solution also offers the option of disabling the camera.

Plus, the MOTO Q PRO solution includes staging services that preload software authorized by your IT team, insert company-specific user instructions in the product box and ship devices directly to end users.
