

Excellence in design.

Rugged and reliable, DTR410 digital on-site radios undergo rigorous testing in the design process using U.S. Military 810 C, D, E and F Standards—so you can rest assured it will hold up under demanding conditions. These tests are designed to simulate the harshest environments, including:

Blowing Rain: Steady rainfall and wind for 30 minutes on every surface.

Salt Fog: 48 hours of exposure.

Vibration: Up to nine hours of exposure to vibration that simulates the rigors that a radio could undergo while being carried or transported.

Blowing Dust: Six hours of blowing dust on all surfaces.

Shock: 18 shocks with a minimum G force of 40 G each.

Temperature Storage: Multiple hours of exposure to storage temperatures as low as -67° F and as high as 160° F.

Productivity perfect for:

Hospitality

Excellent customer service and satisfaction are the keys to loyalty and repeat visits. DTR410 radios help keep the staff connected—from the front desk and concierge, to event planners and maintenance personnel. That means faster response to guest requests, at special events, and in case of emergencies.

Retail

Responsiveness in retail is essential to sales and customer satisfaction. DTR410 radios make seamless service easier to provide, whether it's a price check, clean-up or an emergency. With clear, constant communication ensured, customer service can be taken to the next level.

Construction

Construction projects require timely coordination from management to foremen, subcontractors, and individual tradespeople. DTR410 radios help you keep projects on schedule, meet deadlines and stay within the budget.

Education

Maintaining order and enhancing student safety are priorities for any school. DTR410 radios keep everyone in touch—from teachers and administrators, to crossing guards and maintenance personnel. That enables a quick response to any situation, often preventing small problems from escalating into bigger ones.

Property Management

With DTR410 radios, building managers, maintenance technicians, groundskeepers and security personnel can respond more quickly to tenant needs or emergencies, minimizing costs and enhancing tenant satisfaction.

Manufacturing

Success in industry depends on efficiency. Clear communication, often in noisy environments, is essential to avoid downtime and enable quick response to problems or injuries. The DTR410's rugged construction stands up to industrial environments, and its long battery life meets the demands of multi-shift operations.

DTR410™ Digital On-Site Two-Way Radio

Do you speak digital?

The better a team communicates, the more efficiently it operates. Motorola DTR410™ digital on-site two-way radios are power tools that enable that communication. Unlike alternative technologies, there are no monthly fees. No service towers. No per-minute charges. Moreover, these durable on-site two-way radios help businesses keep operations on schedule, maximize job shift productivity, enhance security, and increase overall customer satisfaction.

It all adds up to a superb combination of features for your convenience, management and productivity — all at an extraordinary value.

What digital provides

What would two-way radios have to provide to be perfect for on-site operation? Perhaps the ability to call a single unit as well as a group of radios. How about coverage extended by 20%, or up to 45% longer operation on a single charge?* Remarkably, all that productivity-enhancing capability—and more—is provided by the DTR410. You get many other benefits too, including digital audio quality—which stays loud and clear everywhere you have coverage. And best of all, this pace-setting radio operates without monthly fees or annual contracts—and at a very affordable price.

No monthly fees.

No service towers.

No per-minute charges.

* Coverage will vary based on terrain and conditions. All comparison claims made against Motorola CP100/XU2600 analog radio models. High capacity battery used.

The digital difference.

Because the digital technology of the DTR410 enables each unit to have its own unique 11-digit identification, you get a new level of radio communication versatility with these calling features:

Digital One-to-One Private Calling

Communicate privately with a specific user. Recipient can receive an alert—either audible or vibrating. Recipient's unit displays caller's ID.

Digital One-to-Many Group Calling

Public group call — all other DTR410 radios on the same group ID and channel hear communications.

Transmit ID

Receiving radios will display the radio ID of the transmitting unit and, if listed in your contact list, the transmitting unit's radio name.

Scroll list

You can view a recent-calls list, showing the source and target of the last 20 transmissions with time and date information.

Digital Audio Quality

Stays loud and clear everywhere you have coverage.

Frequency Hopping Spread Spectrum (FHSS)

Provides enhanced security with 50 non-overlapping groups.

Enhanced Coverage

Coverage extended by 20%*— up to 300,000 square feet or 25 floors.

Extended Battery Life

Up to 45% longer operation on a single charge.*

DTR Short Messaging Service (SMS)

The DTR410 is capable of sending and receiving 10 preset messages, such as "I'll call you back in 5 minutes." It also allows for keyed in custom messages to meet more specific needs.

Advanced Managerial Features

Including remote disable, remote monitor, over-the-air (OTA) time/date update and contact distribution.

Standard Package Includes:

DTR410 Digital On-Site Two-Way Radio

Swivel Belt Holster

Charger

Drop-in Charging Tray

Lithium Ion Battery
