Motorola’s next generation SURFboard SB5100 Cable Modem incorporates the latest DOCSIS 2.0 Advanced Time Division Multiple Access (A-TDMA) and Synchronous Code Division Multiple Access (S-CDMA) technologies to provide up to three times greater upstream capacity than DOCSIS 1.0/1.1 systems. Packed with power, the SB5100 is interoperable and backward compatible with DOCSIS 1.0 and 1.1 for a fast and timely transition — operators can deploy the SB5100 today without a service interruption. The Motorola SURFboard SB5100 is flexible and allows operators to maximize their current infrastructure investments and also offer additional cost-effective services, all at the same time. Convenient for both operators and end-users alike, the Motorola SURFboard SB5100 ensures end-user security via a top-mounted stand-by button that quickly isolates the USB and Ethernet connection to the PC without disconnecting the cable modem from the RF network. What’s more, the SB5100 simplifies troubleshooting with its front panel status indicator LEDs and integrated HTML diagnostics page. The Motorola SURFboard SB5100 is competitively priced and includes many of the valuable features found in previous SURFboard models, such as USB and Ethernet connectivity, software upgrades available over the network, proven field reliability and quality, advanced RF design and a high-performance processor.

Highly functional and also attractive, the Motorola SURFboard SB5100 features a new, compact design that is a stylish and clutter-free addition to virtually any desktop.

Take advantage of DOCSIS 2.0 technology today with Motorola’s next-generation SURFboard SB5100 Cable Modem.

**HIGHLIGHTS INCLUDE:**

- DOCSIS 1.1 and 2.0 Certified
- Integrated A-TDMA and S-CDMA technology — capable of providing up to 30 Mbps upstream data rate
- WHQL certified USB drivers for Windows® 2000/Me/XP
- New stylish industrial design saves valuable desk space
- Front panel status LEDs and built-in HTML-based diagnostics for quick and easy troubleshooting
- USB and Ethernet connectivity simplifies installation
- Compatible with Windows® 95/98/2000/Me/NT/XP, Mac, Linux and UNIX
- Supports up to 32 users (1 via USB and 31 via Ethernet or 32 users on Ethernet)
- Capable of downloading at speeds up to 100 times faster than 28.8k analog phone modem*
- No telephones lines needed — always on, always connected

*Speed varies based on maximum modem performance, operator and service plan maximums, and compatibility with customer PC’s normal telephone service and equipment.
**CONCLUSION**

The introduction of the Motorola SURFboard SB5100 Cable Modem further demonstrates Motorola's technological leadership, as well as its overall commitment to the cable industry. Equipped to meet DOCSIS 2.0 standards, the SB5100 is a next-generation cable modem that's ready to take advantage of tomorrow's advanced technologies — today. It's interoperable and backward compatible with existing DOCSIS 1.0 and 1.1 systems and allows for cost-efficient incremental system upgrades — and it's also user-friendly, convenient, flexible and simple to install. The Motorola SURFboard SB5100 is DOCSIS 2.0 based to ensure advanced service offerings, excellent performance, seamless functionality and exceptional value … now that's innovative technology.

---

**FEATURES**

- Integrated DOCSIS 2.0 A-TDMA and S-CDMA technology
- 10/100 Base-T Ethernet and USB connectivity
- Supports up to 32 users (1 via USB and up to 31 via Ethernet or 32 users on Ethernet)
- Ethernet and USB connections are bridged allowing LAN traffic between USB device and Ethernet LAN
- Remote management via SNMP
- Software upgradeable over the network

- Top-mounted stand-by button enhances network security to end-user
- Front panel LEDs and built-in HTML-based diagnostic user interface for easy troubleshooting
- Multi-language user guide
- Global safety approval and certificates:
  - CB scheme (EN60950/IEC950)
  - CE-Evaluation test report (EN55022/EN55024)
  - FCC Part 15
  - UL 1950
