

Motorola V.seriesÔ 60c

It's the perfect union of form and function. Motorola's new V.series 60c combines state of the art features and performance with a sleek and elegant design that is sure to turn heads.

The V.series 60c boasts the latest features including an external display, voice activated dialing, web browser, and Motorola's new user interface.

- *Make A Statement*
The V.series 60c's compact design is small enough to fit in your pocket, yet it's easy to use, with a large keypad and displays. The anodized aluminum housing gives this phone an elegant, sophisticated look and a substantial feel that put it a step ahead of the crowd.
- *Do You See What I See...?*
The V.series 60c's unique, dual display offers two viewing options: A large interior display for standard functions and an exterior display that presents caller-ID, text messages or time and date.
- *Talk To Me...*
The voice recognition feature keeps dialing to a minimum and allows you to create short cuts to favorite features. The Voice Note voice recorder lets you leave reminders to do (or have someone else do) those things you can never get done.
- *Effortless Communication*
A completely redesigned user interface (UI) makes keeping in touch simpler than ever and provides numerous new features, including a date book, alarm, 400 phonebook entries, and customizable ringer tones.
- *Text Your Worries Away*
SMS messaging* allows you to stay connected without making a sound, even in the quietest theater or restaurant.
- *Web Without Wires*
The Internet is in the palm of your hand with the V.series 60c's WAP 1.1 compliant microbrowser, which allows quick access to sports scores, weather updates, stock quotes and more.*
- **Expected Availability:** Mid-2001 in North America
