

Motorola A388

The valedictorian of the “smartphone” class, the Motorola A388 is built for those who want it all in one wireless device, without sacrificing function or style. The model A388 provides worldwide phone use, e-mail, handwriting recognition, IM, EMS, fax, Internet access, PIM/PDA functionality, virtual piano keyboard for composing alerts and the ability to add applications for the ultimate customization*. Who needs pants with five pockets if you only need to carry one device? It doesn't slice. It doesn't dice. But it does the rest – it's a real gizmomoto.

Message Your Way

The Motorola A388 lets you select the way you send and receive important messages, by e-mail, Instant Messaging (IM), SMS, EMS or fax*. With room for up to five e-mail profiles, users can easily manage desktop e-mail from the road. Inputting these messages or data is a breeze thanks to the QuickPrint™ handwriting engine and recognition tool or on-screen-QWERTY keyboard. No graffiti dots and dashes here.

Talk to Me

Use the virtual number pad for speedy dialing. Or don't answer the phone at all – an external caller ID lets you see who's calling before opening the headset.

Smarty Pants

Easily customize your model A388 using Java™ 2 Micro Edition (J2ME™) technology to add or remove applications, from business tools to games. Use Motorola TrueSync® to connect with PC's, PIM's, PDA's and other devices to sync contacts, schedules and tasks**. With 2 MB of flash memory, there's room for it all.

All Talk? No Way!

Use the model A388's EMS capabilities to create a messaging masterpiece, adding graphics, animated icons, wallpaper and music to messages. Include customized ring tones and alerts composed on the virtual piano keyboard or insert your own works of art drawn on the Motorola A388's sketch pad. Share your creations with a friend via SMS message or several friends at once via broadcast SMS. If your friends are in sight, use the model A388 infrared port to send data.

Take the Web With You

GPRS technology brings an “always on” connection for a faster Internet experience*. Use the Motorola A388 as a wireless modem for your PC or access WAP Internet sites directly from your phone.

Free Your Mind

The model A388's full PIM/PDA system keeps track of important dates with alarm clocks and calendars, composes to-do lists and keeps mental notes safe with the built-in notepad. The address book captures 28 different fields of information per entry – time to ditch the little black book!

Wander the World

The wireless world is your playground with tri-band GSM technology – use one phone around the globe.

Big on Power, Small on Size

About the size of the ultra-popular Motorola StarTac (3.86 x 2.28 x .9 in.), the model A388 weighs only 4.59 oz, yet boasts up to 270 minutes of talk time and 145 hours of standby time.

* Network and subscription dependent feature. Not available in all areas.

** Designed to synchronize with basic features of the initial release of many popular Personal Information Management (PIM) software and hardware products.
