## **MOTOROLA TALK & TUNES WIRELESS INTERNET CALLING KIT WITH STEREO**

Merging hands-free connectivity with mobile entertainment, the new Motorola Talk & Tunes Wireless Internet Calling Kit *with stereo* provides a seamless, integrated solution for wireless music listening and Internet calling from your Bluetooth®-enabled PC. Certified and designed to work with Skype\*, the Talk & Tunes kit includes the Motorola Bluetooth Stereo Headphones HT820 and the Motorola Bluetooth PC Adapter PC850. Simultaneously stay connected to your PC for music listening and free, unlimited Internet calling to other Skype users\*\* – all without wires! What's more, with the ability to control calls and music directly from the headphones, you have the freedom to roam up to 30 feet away from your PC. So go ahead, groove to your favorite tunes or talk to your hearts content without being tied down. Talk & Tunes is the ultimate fusion of advanced entertainment, communications and convenience.

### **Free & Easy**

The Talk & Tunes kit lets you enjoy unlimited cost-free, hands-free Internet calling to other Skype users anywhere in the world. PC not wireless yet? Simply plug the Motorola Bluetooth PC Adapter PC850 into your PC or laptop's USB port for instant Bluetooth capability, load the required Skype software onto the PC and follow a few easy steps to establish a wireless connection to the Motorola Bluetooth Headphones HT820. With Bluetooth connections up to 30 feet (10 meters) away from your Bluetooth-enabled PC, plus integrated microphone and embedded controls in the HT820 headphones, you can remotely control your conversations with the touch of a button – no wires, all freedom.

### **Wire-free, Worry Free**

Wirelessly stream your favorite tracks from your Bluetooth-enabled PC to your headphones. With precision audio streaming, minimized background noise and integrated music controls, you are not limited to your PC. What's more, the HT820 has a unique feature that simultaneously connects to your PC's Skype software, helping to ensure that you will never miss a call while listening to the latest tunes. When a call comes in, the music pauses\*\*\*, allowing you to answer directly from the headphones. When the call is complete, the music will automatically resume.

### **You Choose**

Whether it's entertainment, communications or mobility you crave, the Talk & Tunes kit provides a seamless, wire-free solution to meet all your connectivity needs -- enjoy approximately 14 hours of music listening, converse with friends and family for approximately 17 hours of phone time or simply forward Skype calls to your mobile phone\*\*\*\* when you need connections on the go.
