

**MOTOROKR T505**

Rock out while you roll – without the wires! MOTOROKR T505 Bluetooth® In-Car Speakerphone and Digital FM Transmitter, enables you to connect a Bluetooth enabled phone to your car stereo without wires or installation. You can make or take calls hands-free and enjoy your own music via the T505’s internal 2-watt speaker or through your car speakers – with the clarity and volume of a car stereo system<sup>1</sup>. Calls will sound crystal clear, thanks to echo and noise reduction. This portable solution clips to the visor, so that it can be taken from car to car. Simply Clip-Tune-and-Go!

**Wire-Free Rocking**

Consumers can enjoy their personal digital music collection over the car speakers, without wires or installation! Music streams from a compatible Bluetooth stereo phone or MP3 player to the MOTOROKR T505, via Bluetooth. The T505 then wirelessly connects to the FM radio to be able to enjoy music and hands-free calls through the car stereo. The music even mutes when calls come in and resumes when the call is complete.

**Leave the Static Behind**

The T505 delivers an optimal connection with the user’s car radio. With the touch of a button, the breakthrough technology of StationFinder™ announces where to tune the FM radio for a clear FM connection. StationFinder is FM transmission done right!

**The Convenience of Hands-Free Connectivity**

Drivers can use their standard or stereo Bluetooth enabled phone to take their calls wirelessly, either over their car stereo or through the T505’s internal 2-watt speaker. Optimized for the car, the T505 delivers features like echo/noise reduction, and Audio CallerID<sup>2</sup>, which lets the driver hear the number of the person calling.

<b>MOTOROKR T505</b>	
Talk Time	Up to 18 hrs (using FM transmitter)
Standby Time	Up to 14 days
