

ROKR™ EM35: Rock and Talk with Unmatched Audio

MOTOROKR™ EM35 delivers an exceptional audio experience for both music and talk. The phone features advanced audio-enhancing CrystalTalk™ technology, a robust music player, virtual stereo surround sound— bringing you beyond a typical listening experience to becoming a part of it – and MOTOMUSIC player⁶ which enables users to play, discover and purchase music. With access to online music stores and stereo Bluetooth[®], EM35 offers an all-around multimedia experience.

Audio Excellence Delivered: EM35 delivers incredible audio with virtual stereo surround sound, connecting you with your music like never before. When listening with earphones, music will sound as if it is playing in the space around your head, rather than inside of your eardrums. Whether listening via the built-in dual speakers, stereo Bluetooth or 3.5mm stereo wired headphones, the EM35 rocks.

Hear and Be Heard: Enhanced CrystalTalk technology amplifies your conversations and helps reduce background noise so virtually nothing comes between you and your call.

Bring Your Music Alive: With MOTOMUSIC player¹, listen to music while simultaneously being connected to the music store. Once connected, access, discover, preview and purchase music from the phone or a PC, get artist information, share favorite tracks with friends, gift tracks from the EM35 and watch videos and free podcasts¹ Over time, MOTOMUSIC player will even make personalized recommendations to match your musical tastes.

Discover New Music: Windows[®] Media Player 11 gives you the freedom to manage your music on a PC and discover new music from more than 200 on-line music stores worldwide^{1,3} ROKR EM35 has an integrated FM antenna that enables FM radio to be played over stereo Bluetooth or external stereo speakers without the use of a headset, and built-in FM radio with SONGID technology¹ to complete the music experience.

Rock On-The-Go: The ROKR EM35 has an integrated FM radio with Radio Data System (RDS)⁴ technology that makes identifying songs and artists easy by displaying available FM station information like song, artist and genre. With an optional 32GB micro SD removable storage card, you can store your favorite songs and take your entire music library wherever you go. And use the FastScroll navigation wheel to quickly access content and search for music (music mode), calendar (phone mode) and multimedia (imaging mode).

Create Memories: Catch life's moments with the 3.1 megapixel camera that captures still images and video. Edit images and share memories with friends and family through the web or messaging features.

Real-Time Information On-the-Go: Pre-installed and downloadable¹ widgets give you access to real-time information such as weather, stock reports and more.

Certain mobile phone features are dependent on the capabilities and settings of your service provider's network. Additionally, certain features may not be activated by your service provider, and/or their network settings may limit the feature's functionality. Always contact your service provider about feature availability and functionality. All features, functionality and other product specifications are based upon the latest available information and are believed to be accurate; however such product specifications are subject to change without notice or obligation.

¹ *Network and/or SIM card dependent feature, not available in all areas. Airtime, data charges, and/or additional charges may apply.*

² *This device supports Bluetooth Headset, Stereo, File Transfer profiles and more. In order for Bluetooth devices to communicate with one another, they must utilize the same Bluetooth profile. To determine the profiles supported by other Motorola devices, visit www.motorola.com/bluetooth. For other devices, contact their respective manufacturer.*

Certain Bluetooth features including those listed may not be supported by all compatible Bluetooth-enabled devices, and/or the functionality of such features may be limited in certain devices, or by certain wireless carriers. Contact your wireless carrier about feature availability and functionality.

³ *The unauthorized copying of copyrighted materials is contrary to the provisions of the Copyright Laws of the United States and other countries. This device is intended solely for copying non-copyrighted materials, materials in which you own the copyright, or materials which you are authorized or legally permitted to copy. If you are uncertain about your right to copy any material, please contact your legal advisor.*

⁴ *RDS transmissions are radio station dependent.*

⁵ *Available user memory varies due to the configuration of the phone, which varies by service provider.*

⁶ *Feature is regionally dependent.*
