For help with using your smartphone, visit support.vzw.com/phones or call 1-800-922-0204 or visit a Verizon Wireless store.

Welcome to the Setup Wizard. To quickly change some common smartphone settings, swipe down from the Status Bar. To learn more about your smartphone, tap Apps > My Verizon Smartphone Features. To manage your account, pay your bill & more, go to verizonwireless.com/myverizon or tap the device name to connect. To send a pre-set text message to the caller, tap and flick to. To answer a call, tap  and flick to. To make a call, tap .

Unlock & Lock Touchscreen
Unlock
Swipe screen right to go to Quick settings. To silence your ringtones, drag the ring switch at the top of the screen left or right. To turn on, drag to the right. To turn off, drag to the left.

Wi-Fi
Make sure your smartphone is connected to Wi-Fi to quickly access your media when you need it on the go or at home. Go to all settings for details.

Bluetooth
Bluetooth works with other Bluetooth certified devices, including hands-free devices, speakers, headphones, and computers. Bluetooth works through walls, doors, and other barriers. Bluetooth devices have a range of about 30 feet. Bluetooth devices send and receive data wirelessly using low energy radio waves. Bluetooth automatically turns on when you connect to a Bluetooth device. To connect your smartphone with a Bluetooth headset or other device, you need to pair with it. To connect your smartphone with a Bluetooth device, tap the device name to connect. To see nearby devices, tap the More button.

Backup Assistance™
This feature allows you to backup and restore data on your smartphone. To learn more about Backup Assistant™, visit backup.vzw.com.

Android Beam™
This feature lets you send photos, videos, music, and other content wirelessly to other Bluetooth enabled devices or Wi-Fi enabled smartphones. To learn more about Android Beam™, visit android.com/beam.

Wi-Fi Direct
Wi-Fi Direct is a peer-to-peer wireless technology that allows you to connect with another Wi-Fi Direct device without the need for a wireless router. Wi-Fi Direct allows devices to discover and connect to each other without the need for a central server. Wi-Fi Direct is an alternative to Bluetooth for wireless peer-to-peer communication. To learn more about Wi-Fi Direct, visit wi-fidirect.org.
Setting Up (continued)
