INNOVATION
2007

Motorola Wins Queen's Award for Enterprise in Innovation

Motorola wins the Queen's Award for Enterprise in Innovation Award recognizing Motorola's leadership in wireless broadband for its pioneering work carried out by its point-to-point wireless solutions group.

The technologies developed by the group, based in Ashburton, in the UK, provide governments, businesses, and service providers, with exceptionally high data rates and high levels of availability when using wireless broadband connectivity in situations that were previously impossible, such as across stretches of water. Motorola's unique patented technology enables many companies to benefit from its high-performance broadband solutions.

The award is aptly timed, coinciding with the 40th anniversary of Motorola in the UK. Sir David Brown, chairman of Motorola Ltd., described the award as "a tremendous achievement" and went on to say "this is the eighth Queen's Award that Motorola has won in its first 40 years in the UK and the first in the innovation category. We look forward to developing many more such innovations in the next 40 years!"

INTERNATIONAL TRADE
2008

Motorola Wins Queen's Award for Enterprise in International Trade

Motorola wins the Queen's Award for Enterprise in International Trade Award, recognizing Motorola's leadership in wireless broadband solutions.

The Queen's Award acknowledges outstanding achievement by companies in the UK and is given solely on merit. Motorola won the International Trade award for the commercial success of its innovative point-to-point wireless broadband solutions. Motorola has tripled its overseas sales since 2000. Exporting to 121 countries, it has sold over 90% of its production overseas.
