

Software Upgrade for Motorola CLIQ™ (2.1.5)

Introduction

This is a software upgrade for T-Mobile-Motorola CLIQ users who are currently using Android™ 1.5 (Cupcake) software versions. The 2.1.5 upgrade for Motorola CLIQ provides new features from Android 2.1(Eclair) and the latest version of MOTOBLUR™.

Who Can Use This Release

All Motorola/T-Mobile USA CLIQ users.

Highlights of the Upgrade

- **More Google™ apps** – Google Speech-to-Text™, Google Maps Navigation (BETA)™, Google Voice Search™ and others have been added to make your CLIQ device even more functional
- **Android Market™** - Updated Market app and access to a larger range of apps specifically designed for devices using Android 2.0 or later
- **More home screen panels** –7 customizable home screen panels so you have more room for your shortcuts and widgets
- **New and enhanced widgets** – Customizable filters, ability to resize widgets, plus new widgets like Contact Quick Tasks and Sticky Note
- **Corporate email access** – Corporate email can now be pushed immediately to your phone
- **Improved multimedia apps** - Media Gallery and Connected Music Player have been enhanced for better interaction with your media

Preserved Phone Settings

- Many data and settings will be preserved. These include: Contacts, Home Screen configuration, Recent Call log, Speed Dial, Bookmarks, Wi-Fi settings, Bluetooth pairings, Corporate Sync setup (except for password), and Text Messages.
- You will be automatically logged in to MOTOBLUR after upgrade.
- Most Android Market applications that were downloaded before the software upgrade takes place will be restored. Some may need to be removed and re-installed in order to work properly (e.g., Google Voice™). However, Motorola does not guarantee all 3rd party applications that were previously downloaded will be compatible with Android 2.1 (Eclair).

Key Considerations

- Motorola has developed this upgrade to provide an enhanced experience for CLIQ owners with new features and improvements to existing features. However with the additional software included on the phone, some users may experience slower operation of some phone functions.
- The upgrade will take up to 40 minutes, depending on speed of your Internet connection. The first time powering up the phone after upgrade may take up to 10 minutes.
- Some data and settings will not be preserved. These include: Ringtones, Volume, Display, Screen Lock password, Wallpaper, MySpace app, Shazam app, Contact shortcuts, Corporate Sync passwords, and Instant Messaging login information.
- While media saved on your SD card will be preserved, DRM-protected media stored on your phone's internal memory will not be preserved. However, users can visit the T-Mobile Web portal, m.web2go.com, and re-download previously purchased content under “My Stuff.”
- myFaves and Mobile Backup apps will no longer be available after the upgrade. However, you will continue to receive the calling benefits and can still manage your Faves contacts through My.T-Mobile.com
- You will need to sign back in to your Google account to restore Google Contacts™, Google Calendar™, and Gmail™.
- Bluetooth devices may need to be re-paired.
- Contacts that were merged manually will need to be re-linked.

- After the upgrade, available device memory will be reduced by approximately 40MB. To install the upgrade, you must have at least 40MB of device memory available.
- After the upgrade, your contacts and email from Google and MOTOBLUR may take up to 60 minutes to synchronize. The device may appear slower during this initial synchronization process.
- To start the upgrade, your phone will need to be on one of the latest releases of software (Blur_Version.1.6.1.MB200.T-Mobile.en.US or higher). See the upgrade web site listed below for more detailed information if you believe you are on an older release.
- You will not be able place or receive calls during the upgrade.

How to Install the Upgrade

Please go to www.motorola.com/cliq-eclair-upgrade and follow the instructions.
