

# Motorola Ventures Portfolio of Companies

- **A123 Systems**

A123 Systems is a leading supplier of high-power lithium ion batteries using proprietary Nanophosphate™ technology that delivers previously unattainable levels of power, safety and life.

- **Agion**

Agion is a leader in providing safe, natural antimicrobial solutions based on silver, "Nature's Antimicrobial." The company is dedicated to developing consumer- and environmentally-friendly solutions for antimicrobial protection.

- **AirClic**

AirClic Inc. is a web-based software and mobile information services company that extends the reach of an enterprise by providing a simple, cost-effective means for a mobile or remote workforce to capture and communicate important information.

- **AmberPoint**

AmberPoint's SOA runtime governance software simplifies visibility and control of complex SOA systems. Its policy-based solutions manage the health and well being of their distributed, heterogeneous service networks.

- **AMIMON**

AMIMON is a fabless semiconductor company pioneering wireless uncompressed high-definition video for universal connectivity among consumer electronics video devices.

- **Amobee**

Amobee delivers a unified, telco-grade system for funding mobile content and communications through advertising revenues.

- **Apprion**

Apprion is dedicated to providing industrial facilities with the most reliable, and secure wireless networks, devices, applications and services. Apprion's ION System is an open, standards-based wireless infrastructure that let's you better manage your operations with reliability, security and scalability — to drive performance and lower operational costs.

- **Broadlight**

BroadLight leads delivery of end-to-end (E2E) PON technology through its comprehensive and innovative product solutions consisting of highly integrated semiconductor devices, embedded and application software, reference designs and support tools.

- **BDNA**

BDNA provides comprehensive, accurate and immediate global enterprise asset inventory solutions at an exceptionally low burden to an organization and its network.

- **Camera**

Camera's revolutionary Xaver™ real-time 3D "Through-Wall Vision" products allow users to observe multiple stationary and moving objects concealed by walls.

- **Cedar Point Communications**

Cedar Point Communications offers a totally integrated voice and multimedia switch that provides IT departments and network operators with a cost-efficient, less complex Voice-over-IP (VoIP) alternative to distributed softswitching and legacy PBX telephony options.

- **CopperGate**

CopperGate Communications is a system-on-chip company that develops markets and sells chipsets for the home networking and MDU/MTU Broadband Access markets.

- **DesignArt Networks**

DesignArt Networks develops powerful System-on-a-Chip (SoC) silicon platforms, driving the evolution of the WiMAX and 4G radio access infrastructure, towards high-density, high-capacity base station deployments with ubiquitous outdoor and indoor coverage.

# Motorola Ventures Portfolio of Companies

- **DeviceAnywhere**

DeviceAnywhere solves one of the biggest challenges facing mobile applications and content developers — access to handsets in target carrier networks. DeviceAnywhere is a revolutionary online service that provides access to hundreds of real handsets, on live worldwide networks, remotely over the Internet.

- **Dilithium Networks**

Dilithium is a global leader in converged video solutions for mobile and broadband networks and the Internet.

- **E Ink**

E Ink Corporation is the leading provider of electronic paper display (EPD) technologies. Products made with E Ink's revolutionary electronic ink possess a paper-like high contrast appearance, ultra-low power consumption and a thin, light form.

- **GoTV**

GoTV Networks is the first made-for-mobile television network and studio group that is changing the way people use their wireless phones.

- **GreenPeak**

GreenPeak is a fabless semiconductor, module and software company offering ultra low power wireless communication technology for sense and control applications.

- **Handmark**

Handmark is a global leader in the development and distribution of mobile media, focused on creating and delivering consumer-friendly access to the best news, reference and information content for wireless devices.

- **Ignition Partners**

Ignition is a venture capital firm that invests in emerging future leaders in communications, Internet, software and services across business and consumer targets.

- **Illinois Ventures**

Illinois Ventures is a seed and early-stage technology investment firm focused on research-derived companies in information technologies, physical sciences and life sciences, with a particular emphasis on those deriving from research conducted at the University of Illinois and other regional research institutions and federal laboratories.

- **Inside Contactless**

INSIDE Contactless is a global leader in open-standard contactless payment and Near Field Communication (NFC) semiconductors and software that power the next generation of payment, transit, identity and access control applications.

- **Invidi**

INVIDI provides cable, satellite and IPTV operators the opportunity to position their services as a comprehensive source for targeted television advertising and promotion.

- **Jerusalem Global Ventures/CommLaunch**

CommLaunch Ventures, the communications fund of Jerusalem Global Ventures, is an early-stage venture capital fund that initiates or invests in Israeli and Israel-related high-technology companies in the field of communications-infrastructure technology.

- **KXEN**

KXEN provides next generation business analytics software to drive better corporate decisions.

- **Legend Silicon**

Legend Silicon Corp is a fabless semiconductor company engaging in the development of broadband wireless transmission technologies and products.

- **Lumidigm**

Lumidigm Inc. is a biometric company dedicated to enabling convenient, secure and reliable identification and verification.

- **Lux Capital**

Lux Capital Management is a research-driven investment firm focused on de novo, seed and early stage investments in the physical and life sciences.

# Motorola Ventures Portfolio of Companies

- **mFoundry**

mFoundry is a leading provider of mobile financial services. The mFoundry platform is an open and flexible solution that enables all players in the mobile financial services ecosystem to mobilize and distribute their services.

- **MobilEye**

MobilEye N.V.® is a pioneer in the development of vision systems for intelligent transportation systems (ITS).

- **Molecular Imprints**

Molecular Imprints provides enabling lithography systems for manufacturing applications in: nano devices, microstructures, advanced packaging, bio devices, optical components and semiconductor devices.

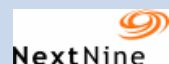

- **MobiMate**

MobiMate Ltd. is a wireless application service provider whose focus is on serving business travellers throughout their travel experience.

- **New Margin Ventures**

NewMargin Ventures is a leading venture capital management company in China.

- **NextNine**

NextNine's innovative remote support automation platform allows technical support organizations to proactively and automatically deliver support via proactive monitoring, remote monitoring, remote diagnostics, self healing and more.

- **Ocean Broadband Networks**

Ocean Broadband Networks is dedicated to designing and developing a true broadband access platform and solutions by conquering the last mile bandwidth bottlenecks in access networks and delivering lower cost services with its leading-edge GPON technology.

- **OpenCloud**

OpenCloud is a leading open technology vendor in the event-driven application server market.

- **OQO**

OQO has redefined mobile computing with its pocketable, dockable, full-featured computer running standard Windows® XP or Vista operating systems, which gives the mobile individual or workforce true Anytime/Anywhere Productivity.

- **Ruckus Wireless**

Ruckus Wireless is a next-generation Wi-Fi company focused on making Wi-Fi reliable enough to be used as a utility in the home, office, hot spot and around the world.

- **Scanbuy**

Scanbuy is the leading global provider of mobile barcode solutions that use the camera phone as the link between the physical world and the digital world.

- **Sensitive Object**

Sensitive Object's Anywhere MultiTouch™ platform extends tactilization to any surface of a device allowing for virtual controls and next generation user-interfaces.

- **Sequans Communications**

Sequans Communications is a leading supplier of fixed and mobile WiMAX silicon and software based on IEEE 802.16 standards.

- **Sequoia Communications**

Sequoia Communications is a fabless RF semiconductor company setting new benchmarks in multi-mode design and integration.

- **Siimpel**

Siimpel specializes in Integrated Optical MicroSystems with expertise in micro-electro-mechanical systems (MEMS), optics, electro-optical design, image sensors, packaging

# Motorola Ventures Portfolio of Companies

- **SIMtone**

SIMtone has developed and commercialized the patent-pending SIMtone, universal service platform that allows telecom, cable and wireless operators to deliver services such as virtual desktop environments, applications and media content seamlessly to a wide variety of devices including PCs, thin clients, mobile devices, set tops and terminal devices.

- **SkyBitz**

SkyBitz delivers real-time tracking and information management solutions that provide a clear line of sight to mobile assets anytime, anywhere.

- **Sportvision**

Sportvision, Inc. delivers a heightened sports viewing experience across all forms of media.

- **Storyz**

Storyz has developed an innovative social media platform that connects users and communities through a "content-neutral" media format.

- **SXIT**

SXIT provides value-added service software and enterprise information application software solutions to major carriers in China.

- **Paladin Capital Group**

Paladin Capital Group's Homeland Security Fund invests in companies with products and services that address homeland security and needs for both private enterprise and government customers.

- **UDcast**

UDcast is a global leader in the convergence of IP and broadcast media, focusing on IPTV to mobile and satellite-aware enterprise networking solutions.

- **VidSys**

VidSys is a leading provider of Physical Security Information Management (PSIM) solutions and operations software that provides truly collaborative situational awareness for safety, security, military and transportation organizations.

- **VirtualLogix**

VirtualLogix develops and markets VirtualLogix VLX, the partitioning and virtualization software platform that allows embedded systems to run heterogeneous operating systems and applications efficiently and safely.

- **ViVOtech**

ViVOtech is a leading software provider of Near Field Communications (NFC) mobile phone payments, over-the-air (OTA) provisioning of promotions and payment cards and smart poster applications.

- **Vocel**

Vocel is a pioneering wireless push technology company and developer of the Interactive Commerce Accelerator wake-up mobile marketing service.

- **Vocera Communications**

Vocera Communications enhances business productivity, teamwork, and service levels by enabling fluid, instant voice communication among team members, across groups and throughout an organization of mobile professionals.

- **Xanboo**

Xanboo provides an end-to-end technology solution that enables access and control of any enabled device or appliance locally via a TV or PC, and remotely over the Internet.

- **Zenverge**

Zenverge is a fabless semiconductor company delivering advanced, cost-effective solutions for content storage, playback, interoperability, mobility and networking in the next generation of digital media products.

# Motorola Ventures Portfolio of Companies

- **Zephyr**

Zephyr is a global market leader in physiological and biomechanical monitoring technology and solutions for real world deployment. The company supplies its patented fabric sensors and complete monitoring solutions for markets including Defense, First Responder, Research, Sports and Healthcare.

- **Zoom Systems**

ZoomSystems is a pioneer in a revolutionary new channel of automated retail.
