

Application Brief: InVision Cradle Solutions for the PPT8800 Series

Partner Profile: InVision Software

InVision Software is a privately held software and hardware design solution company formed in 1995 with years of valuable experience in software and hardware design. InVision Software's team provides highly advanced technologies to fit any project or need as well as supply expert on-site technology support to meet the needs of Symbol Technologies' product users, servicing clients throughout the United States and abroad. InVision recently announced a new line of cradles to support Symbol PPT8800 mobile PDAs.

Ethernet Cradles: Fast, Reliable Network Access to Mission-Critical Information

InVision Single-Slot charging Ethernet cradles deliver location-independent data synchronization as well as access to files, local area networks (LANs) and the Internet to users of Symbol's PPT8800 mobile PDAs. Requiring only a power source and Ethernet connection, these cradles increase productivity and help reduce costs with more efficient software distribution through the LAN, improved hardware and software asset management as well as enhanced backup and recovery of data capabilities.

Features	Benefits
Automatic IP address assignment via DHCP or static IP addressing	Allows rapid, easy installation to reduce startup time
Single-slot form factor	Offers more versatility in areas with space constraints
No desktop PC needed to synchronize over the network	Enables broad deployment at a lower cost
Single button/automatic synchronization	Provides efficient one-touch synchronization for improved user productivity
Simultaneous charging for terminal and spare battery	Delivers convenience and mobility for users

Modem Cradles: Powerful Portability for Flexible Remote Access Solutions

The InVision 33.6 kps Single-Slot Charging Modem Cradles provide a reliable connection to link and download data from Symbol's PPT8800 to a central location. Using the charging modem cradle, PPT8800 handheld users can remotely access a PC or connect to the Internet at any time over dial-up phone lines. Easily adaptable to a serial cradle, InVision charging modem cradles offer more flexibility to provide a one-to-one communications link between a single terminal and a host computer.

Features	Benefits
Modem cradle with two RJ11 phone jacks to accommodate an external phone	Offers improved productivity with remote synchronization over dial-up phone lines
Serial cradle with a RJ45 connection	Delivers flexibility for small businesses, where only a few users may synchronize their terminal to the host
Single-slot form factor	Offers more versatility in areas with space constraints
Single button/automatic synchronization	Provides efficient one-touch synchronization for improved user productivity
Simultaneous charging for terminal and spare battery	Delivers convenience and mobility for users

Symbol PPT8800 and InVision Cradles

Designed for mobile workers and managers within the enterprise, the small, lightweight PPT8800 is powerful enough to execute mission-critical applications and packed with features that make it easy for global organizations to manage broad systems deployments. And InVision charging cradles, used with the PPT8800, help companies further realize reduced support demands, improved mobile worker productivity, fast startup and complete product solutions.
