

DTR™ 620 for Manufacturing

Digital On-Site Two-Way Radio

Success in industry depends on two things... efficiency and responsiveness. Clear communication, often in noisy environments, is essential to avoid downtime—and to enable the fastest response to production problems or injuries. The DTR Series delivers. Its rugged construction stands up to industrial environments and the demands of overtime and multi-shift operations.

Thanks to digital technology, DTR Series radios give you the ability to call specific groups of employees—or even a single worker. You also get extended coverage, and longer operation on a single charge. Remarkably, you'll have all that productivity-enhancing capability—and more—in the DTR 620 Radio.

You get many other benefits, too, including digital audio quality—which stays loud and clear everywhere you have coverage. And best of all, this pacesetter performance is yours without monthly fees or annual contracts—and at a very affordable price.

Do you speak digital?

Why Motorola Digital On-Site Two-Way Radios Are Right For Manufacturing

DIGITAL ONE-TO-ONE CALLING

Allows you to call and talk privately with a specific user's radio. A private-call recipient can receive an alert—either an audible or vibrating signal. And the recipient's unit displays the caller's ID.

DIGITAL ONE-TO-MANY CALLING

- Public group call—all other DTR Series radios on the same group ID and channel hear communications, similar to analog radio operation.
- Private group call—enables you to program DTR Series radios to communicate with specific sets of group members. Caller ID displays group identification.

Individual unit identification also enables:

- Call forwarding to other radio IDs—notify others that you're unavailable and allow them to speak with another contact for assistance.
- Transmit ID—receiving radios will display the radio ID of the transmitting unit.
- Short message service (SMS) text messaging—with ten preset messages and support for keyed-in custom messages to meet more specific needs.
- Scroll list—displays frequently used group and private IDs for easiest access.

It all adds up to a superb combination of features for your convenience, management, and productivity, all at an extraordinary value.
