

## Unrivaled Wireless Solutions That Deliver Greater Agility

Motorola's unparalleled wireless solutions portfolio, supported by powerful network management and security solutions, provides the agility needed to reduce costs and increase productivity today, while preparing you for future growth, whether you are an enterprise, government, service provider, healthcare facility, educational institution or other organization.

### The Industry's Trusted Wireless Partner

No one knows wireless like Motorola. A pioneer in wireless communications, Motorola leverages more than 80 years of experience in wireless technology and customer support. As an acknowledged global leader and innovator, Motorola has earned the trust of a wide range of organizations around the globe, with more than 10,000 networks now in operation in more than 120 countries. Our customers include many of the most progressive and successful organizations in the world, including state and federal agencies, shipping companies, service providers, automobile manufacturers, medical organizations, universities and retailers.

### The New Wireless World

In the new wireless world, the value of wireless solutions is multiplied when systems work together seamlessly and are trusted to be reliable, available and secure. With this new-world approach to wireless solutions, organizations can move with greater confidence and speed enabled by trusted wireless networking.

### Building Agility With Motorola

**Mobilizing voice and data onsite.** Highly reliable and secure onsite Motorola WLAN access gives workers the freedom to be effective wherever they are, and Motorola's integrated voice solution allows workers carrying Motorola Total Enterprise Access and Mobility (TEAM) VoWLAN smartphones, voice-enabled mobile computing devices and two-way radios all to talk together whenever needed.

**Extending to new places.** Whether covering new outdoor areas with WiFi access networks or building new broadband connectivity to hard-to-reach facilities, Motorola's industry leading outdoor wireless broadband portfolio can quickly establish secure and reliable network presence.

**Capturing and sharing video.** Motorola gives customers the flexibility to place cameras anywhere they are needed for security, incident response and collaboration. Video can be captured and then delivered with superior QoS to users with wireless devices on the network.

**Backing-up and replacing leased lines.** Industry-leading wireless point-to-point wireless Ethernet bridges from Motorola can either ensure business continuity by backing up traditional leased line connectivity, or reduce recurring costs by serving as a T1/E1 replacement.

**Managing the network.** Motorola network management tools use powerful map-based visualization technology to help maximize uptime through earlier issue identification and faster recovery. Advanced troubleshooting tools also give the level 1 helpdesk staff the ability to resolve issues more quickly.

**Securing and defending the network.** Motorola's industry-leading wireless intrusion protection software and superior hardware-embedded security features keep the wireless network running smoothly so that the impact to users and operations is minimized.

# Putting It All Together: Staying Ahead of the Curve with Wireless Agility

## Motorola Wireless Network Solutions For Today and Tomorrow

Motorola network solutions give your organization unprecedented efficiency and flexibility. Only Motorola can provide the end-to-end wireless communications that make the most of today's capabilities, and that enable the next generation of services, applications and business processes that will lead to a more prosperous future.

New agile operations and services are a key factor in staying ahead of the curve in our new economy. As a leader in wireless network solutions, Motorola helps you build wireless agility through the use of holistically managed and secured wireless networks and devices. That enables your organization to get the right information in the right hands right when it is needed for maximum impact and effectiveness.

**Unrivaled Portfolio of Solutions.** Motorola's wireless portfolio ranges from indoor to outdoor wireless access networks with WLAN and outdoor Mesh Wide Area Networks as well as Fixed Wireless Broadband. It also spans from network infrastructure to a broad range of wireless devices including the Total Enterprise Access and Mobility (TEAM) VoWLAN solution. Working together, this broad set of solutions delivers greater interoperability and smoother, faster deployments.

**Trusted Networking.** Count on exceptional wireless network security, reliability and availability with Motorola's innovative Wireless Manager, RF Management System and AirDefense Solutions. These tools make a Motorola wireless network a strong yet flexible base on which to build new wireless-enabled agile operations and services.

**Anywhere Access.** To get real-time information into the hands of users at the point of work, the wireless access network is extended with the right devices and applications for the job. Motorola's TEAM VoWLAN solution provides integrated mobile access to critical communication services while also creating interoperability with voice-enabled mobile computing devices and two-way radios.
